MORE SHOOTING IN LENGIR.-We learn from a private source, that a Mr. White, or Kinston, having occasion to go to his cotton house one night last week, was shot at and wounded, by a party of men who were at of near the house. COTTON FACTORY .- The Charlotte Times understands that a number of capitalists have in contemplation the crection of a cotton factory in or near Charlotte, that will convert into yarn or cloth an immense amount of the raw material. It is well known that a large amount of money is now deposited in the banks, and when the pres ent crop is sold, a still larger quantity will be seeking investment.

THE CROPS ABOUT WELDON .- The News says many planters contend that not more than half a crop will be made, while others claim a larger proportion, but from all the information we can obtain, both from peronal observation and from a continuous mingling with the farming community, we not think that in this county the cron as been injured much, if any, over a third some sections have sufferer comparatively ittle. In Northampton the damage will not fall short of one half. The beavy rain of Sunday evening did some injury in washing ut the cotton, thus damaging it.

PENITENTIARY STOCKADE. - This receptacle for the seamps and villians within our State borders, is fast approaching completion. We expect to be able to announce in a few days perhaps two weeks that the enclosure has been finished.

A fire occurred at Lillington, New Hano ver county, Tuesday night, which destroyed a store house and contents. The property belonged to S. H. Manning of Wilmington, and the Journal says the loss is estimated at from \$3,000 to \$4,000-partial insurance.

TERRIFIC WHIRLWIND .- The most terrific whirlwind, within the recollection of the oldest inhabitants, passed over a space of territory four hundred yards wide, in Wayne county, near Dudley, Sunday afternoon last, twisting off hugh limbs and uprooting trees-demolishing fences generally. The people were greatly alarmed:

The people appreciate the fact that the STANDARD is the People's Paper. Yesterday we received one hundred and twentysix new subscribers to the Weekly STAND-ARD and seven to the Daily. We spoke of the lack of mail facilities in North Carolina, a few days since, and expressed the hope the many old routes that have been suspended since the war be speedily restored, that our people in the most remote part of the State might at least have a weekly mail. We again renew the hope that the Postmaster General will heed the cry of our people for relief.

COMMITTEE ON THE PENITENTIARY.—This body convened in the Senate Chamber yesterday. Hon. Alfred Dockery, in the chair present, Messrs, G. W. Welker, A. L. Lougee, A. Howe and John R. Harrison.

Mr. Welker submitted his report in regard o his visit to several Penitentiaries in other States, which was adopted, and a vote of thanks was unanimously tendered Mr. W. for the valuable information which he had embodied in the report. Messrs. Welker, Lougee and Harrison were

appointed a committee to prepare a system of rules and regulations for the conduct of the penitentiary. The committee have adopted measures to

scertain the number of convicts now conined in county prisons, sentenced to labor in the penitentiary.

The number of prison guard have been ixed at twenty-four men, with a sergeant. The committee next proceeded to open the bids for brick for the penitentiary, when appeared that,

A WARNING TO THIEVES .- Thieves who break in and steal the bacon and corn meal of the hard-working man, must remembe that if they should happen to get hold of some "fixed meat" or poisoned meal, and from the use thereof sicken and die, they receive merited punishment. We have been assured, that in certain localities, where smoke-houses and dairies have been broken open and robbed, such an arrangement has been entered into, and we may expect soon to hear of sudden and extraordinary deaths.

The experiment is surely a dangerous one. as the innocent child and unsuspecting wife are liable to become the victims as well as the thief. Therefore as "honesty is the best policy," and as "labor will bring its reward" would it not be better for all men to work, and enjoy, not only their daily meals, but a good conscience?

The following illustrates the uncertainty of getting a good article, when it is pilfered. Three young men of Antwerp, while out on a spree, went into a cheese factory to get a drink of milk. While the proprietor's back was turned they seized a cake lying on the table, and getting into their buggy left in a hurry. The man missed his cake as soon as they had gone, and the "situation" flashed upon his mind, he harnessed his horse and followed them as fast as possible. When he overtook them and them all in convulsions. The cake had been bailed by His Honor, Judge Thomas, in a bond of \$10,000, appeared before the said They narrowly escaped with their lives.

have more practical sense than their masters who imported them from their father-land are disposed to give them credit for. On their arrival in this country they are in a great degree helpless—quite dependant on their "new guides," and they, the Swiss, with their tongues dumb, work; but they soon acquire a knowledge of our language, and then they are no longer servile slaves, at salary of \$10 per month, but set up for hemselves.

We have seen something of this within the last twelve months, and we know, whereof we write-and we are more fully convinced, with every day's experience, that the true labor for the South is that already among us, and some few who have tried foreign labor, have dispensed with it, and are now willing to admit that the colored man is more reliable and better adapted to our wants and do better work than those brought from foreign countries. It is right and proper and wise that we should employ the colored man and pay him a good price for his labor.

The same disposition prevails in this section also; but the great scarcity of money prevents action. Mon ey invested judicious ly in real estate, is the very best way to "lay it out"-and much of the money realized from the present cotton crop will find investment in lands. Raleigh, August 24th, 1869. Raleigh, August 24th, 1869.

I have carefully examined Professor Bernhardt's Spectacles, and take great pleasure in recommending him to those who having defective vision can be made to see more clearly and distinctly by the use of glasses. He has wonderful skill in this respect.

The pair he has supplied me with are Brazilian pebble of most superior quality and excellent finish. They enable me to see how to read or write at the ordinary local distance, as clearly and distinctly as I did twenty years ago. I very cheerfully bear testimony both to the Professor's skill and to the wonderful properties of his glasses.

CHS. E. JOHNSON, M. D. Raleigh, August 24th, 1869. I take great pleasure in saying that the glasses I have obtained (and am now using) from Dr. M.
